NOTABLE PROJECTS

- **MeViTSA: Multimodal Sentiment Analysis** ISI Kolkata
Github: [Click here](#) (Jun.'25 - Dec'25)
Keywords: Ensemble model, Late fusion
Multimodal Sentiment Analysis of Visuals Integrated Text Data
 - Improved accuracy by 3-9% over existing SOTA methods and datasets.
- **Raag Sense: Indian Classical Raga recognition system** RKMVERI, Belur
Github: [Click here](#) (Jan.'25 - present)
Tools: RAG, OpenAI, Ollama, LangChain, MFCC, CNN
 - Building LangChain-based pipeline for modular query and retrieval to integrate RAG (active)
 - Curated an ICM-specific dataset, designed ICM-aware MFCC features, and trained a CNN achieving 96.82% raga classification accuracy, establishing a new benchmark.
- **ChessLens: Chess game live digitization** RKMVERI, Belur
Github: [Click here](#) (Jan.'25 - Apr.'25)
Tools: PyTorch, Open-CV
 - Aimed to build a cost-effective CV system as a potential replacement of expensive DGT boards.
 - Implemented CNN-based occupancy detection that achieved an accuracy of 93.75%.
- **Savoring Sentiments** IIT Madras
Github: [Click here](#) (Jan.'24 - Apr.'24)
Keywords: EDA, TF-IDF Vectorizer, LightGBM
 - Implemented LightGBM with TF-IDF text vectorization, achieving 93.85% accuracy.
